

Amodel[®] ET-1000 HS polyphthalamide

Amodel® ET-1000 HS is an impact modified, heat stabilized polyphthalamide (PPA) that exhibits exceptional impact strength and toughness. Like all Amodel® PPA resins, ET-1000 HS offers high fatigue strength, good chemical

resistance and high mechanical property retention over a broad temperature and humidity range.

• Natural: ET-1000 HS NT

Front Temperature	316 to 329 °C	
Processing (Melt) Temp	321 to 343 °C	
Mold Temperature	> 135 °C	

Injection Notes

MOLD TEMPERATURE

• If the wall is thick, lower temperatures may be used to prevent ejector pin problems.

STORAGE:

• Amodel® compounds are shipped in moisture-resistant packages at moisture levels according to specifications. Sealed, undamaged bags should be preferably stored in a dry room at a maximum temperature of 50°C (122°F) and should be protected from possible damage. If only a portion of a package is used, the remaining material should be transferred into a sealable container. It is recommended that Amodel® resins be dried prior to molding following the recommendations found in this datasheet and/or in the Amodel® processing guide.

Notes

Typical properties: these are not to be construed as specifications.

¹ Maximum Load: 1050 lb (4670 N)
